## AUDREY HEPBURN IS STILL ALIVE

Audrey Hepburn is still alive. She is 79 now and has been kept in Scotland in the Queen of England's concentration camp. Audrey has been in the concentration camp since the illuminati faked her death in 1993. She has spent 25 years being beaten and having cold water thrown on her naked body.

The Queen of England likes to personally beat Audrey Hepburn. The Queen always felt ungainly and ugly. She hated Audrey Hepburn her whole life because Audrey was elegant and beautiful.

It's time to return Audrey Hepburn to America. She is a national treasure and an iconic actor. Just because the Queen of England is a self-loathing heartless evil torturer, doesn't mean the world has to let her torture Audrey Hepburn. The illuminati is evil. Their NWO involves stealing the world's greatest talent and silencing them.
