TEXAS' WAR AGAINST THOMAS JEFFERSON

The school board in Texas has an unnatural influence on all the textbooks in America. They are trying to use America's textbooks to create a new vision of a racist white supremacist America. The illuminati wants them to create text books that lie about our history.

The Texas Board of Education, controlled by Republicans, is trying to rewrite American history and deny basic science like evolution. They are trying to make American education into Catholic illuminati bullshit. The same board try to have Darwin removed from textbooks in 2009.

The illuminati hates Thomas Jefferson, they want to edit him out of American history and with their Texas textbooks they've done just that. The Board removed Thomas Jefferson from the Texas curriculum, "replacing him with religious right icon John Calvin."

As the nation's second-largest textbook market, Texas has enormous leverage over publishers, who often "craft their standard textbooks based on the specs of the biggest buyers." Indeed, as The Washington Monthly has reported, "when it comes to textbooks, what happens in Texas rarely stays in Texas."
